## Participating Institutes

Virtual Labs provides a fully interactive simulation environment to perform experiments, collect data, answer questions to assess the understanding of knowledge acquired. In order to achieve the objective of such an ambitious project, it is essential to develop virtual laboratories with state-of-the-art computer simulation technology to create real world environments and problem handling capabilities. IIT Delhi as the Nodal Institute and other 10 institutes is understanding this initiative.

- ✓ To provide remote access to virtual laboratories in disciplines of Science and Engineering
- ✓ Implemented by IIT Delhi
- ✓ To share costly equipment and resources, which are otherwise available to limited number of users due to constraints on time and geographical distance
- ✓ Cover 100 Virtual Labs, approximately 1000+ web-enabled experiments.

**E-Yantra enable the effective education across engineering colleges in India on embedded systems and Robotics. The training for teachers and students is imparted through workshops where participants are taught basics of embedded systems and programming. Engagement of teachers and students in hands-on experiments with robots by way of competition-event based innovative method of problem-solving with out-of-box solutions. e-Yantra also help in setting up Robotics labs/clubs to make it a part of their routine training curriculum. 296 colleges across India have benefited with this initiative.
